

NOTIFICATION

The Ministry of Health informs the general public that both the active community surveillance in Phuntsholing and surveillance along the Thimphu- Phuntsholing high way have been completed and results are all out. Kindly note that your test results are negative for those who did not receive any calls from the surveillance team. Only positive cases have been contacted, their contacts traced and quarantined.

As test results from the above surveillance show only few cases outside the cluster of RRCO, MDP and DANTAK, the risk of spread of COVID-19 to gewog of Chukha dzongkhag is low as of now. Therefore, people in gewogs who have travelled to Phuntsholing between 1 August till start of lockdown need not be tested unless people have visited RRCO, MDP and DANTAK.
